Handbook of Forensic Mental Health Services

Edited by Ronald Roesch, Simon Fraser University, Burnaby, BC, Canada and Alana N. Cook, Department of Psychology, Simon Fraser University, Burnaby, BC.

Series: International Perspectives on Forensic Mental Health

Handbook of Forensic Mental Health Services focuses on assessment, treatment, and policy issues regarding juveniles and adults in the criminal and civil systems. Uniquely, this volume is designed for professionals who deliver mental health services, rather than researchers. Just like its parent series, its goal revolves around improving the quality of mental health care services in forensic settings. It achieves this by integrating the findings related to clinical practice, administration, and policy from trends and best practice internationally that mental health professionals can implement.
